-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 January 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Drawings

The drawing objection is withdrawn as the plunger valve is shown in the drawings (and described in the specification) of related provisional application 60/412,509. However, should the present application be allowed including a claim or claims directed to the plunger valve, the Applicant will be required to amend the drawings (and the specification as necessary) to bodily incorporate the plunger valve as disclosed and shown in the provisional application.

Election/Restrictions

Applicant's election with traverse of Species 1, claims 1-4 and 6-10 in the reply filed on 1/18/05 is acknowledged. The traversal is on the ground(s) that bistable valves of both the lever and plunger type are known. This is not found persuasive because specific features of at least the lever valve are specifically claimed in Applicant's dependent claims, and also the two type of valves have widely varying configurations, actuators, and uses in the prior art.

The requirement is still deemed proper and is therefore made FINAL. Claim 5 is thus withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Loe.

The Loe reference discloses a system comprising a signal controller which converts a unipolar signal to a bipolar signal (see col. 4, lines 1-6), and a magnetically actuated valve controlled by the controller (see col. 1, lines 13-19).

Allowable Subject Matter

Claims 2-4 and 6-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Abe reference discloses an apparatus for converting a unipolar signal to a bipolar signal.
